

Antonio Cruciani

February, 2026

Aalto University

Tietotekniikantalo, Konemiehentie 2, 02150 Espoo, Finland

antonio.cruciani@aalto.fi

<https://antonio-cruciani.github.io/>

Current Position

Postdoctoral Researcher, in Computer Science at Aalto University. Working with [Jukka Suomela](#).

Espoo, FI
Mar. 2025 – Now

Education

Ph.D. Student, in Computer Science at Gran Sasso Science Institute.
Thesis: *Models and Algorithms for Temporal Betweenness Centrality and Dynamic Distributed Data Structures.*

L'Aquila, IT
Nov. 2020 – Mar. 2025

<https://iris.gssi.it/handle/20.500.12571/34764>

Grade: Excellent.

Supervisor: [Francesco Pasquale](#) (University of Rome “Tor Vergata”)
co-Supervisor: [Pierluigi Crescenzi](#) (Gran Sasso Science Institute)
Reviewers: Christian Scheideler, Fabio Vandin.

M.S., in Computer Science, University of Rome “Tor Vergata”, *summa cum laude*.
Thesis: *Dynamic Random Graphs and unstructured P2P networks, analysis of two models inspired by the Bitcoin network.*

Rome, IT
2017 – 2020

Supervisor: [Francesco Pasquale](#) (University of Rome “Tor Vergata”)

B.S., in Computer Science, University of Rome “Tor Vergata”.
Thesis: *Efficient learning methods for playlist prediction.*
Supervisor: [Giorgio Gambosi](#) (University of Rome “Tor Vergata”)

Rome, IT
2011 – 2017

Academic Appointments

Visiting Researcher Fellow, KTH.
Host: [Aristides Gionis](#)

Stockholm, SE
June 2025

Visiting Researcher Fellow, Department of Computer Science University of Hamburg.
Host: [Thorsten Götte](#)

Hamburg, GE
January 2025

Visiting Researcher Fellow, Department of Computer Science and Engineering, IIT Madras.
Supervisor: [John Augustine](#)

Chennai, IN
1st-Aug. – 31st-Oct. 2024

Visiting Researcher Fellow, Department of Computer Science and Engineering, University of Padua.
Host: [Leonardo Pellegrina](#)

Padova, IT
July 2024

Visiting Researcher Fellow, Department of Computer Science and Engineering, IIT Madras.
Supervisor: [John Augustine](#)

Chennai, IN
1st-Aug. 2023 – 27th-Feb. 2024

Visiting Researcher Fellow, Big Data Analytics Lab, Fondazione Ugo Bordoni
Supervisor: [Giambattista Amati](#)

Rome, IT
Feb. – Nov. 2020

Teaching Activities

Invited Teacher, CS-E4565 - Combinatorics of Computation D. (MSc), Aalto University. Covered the opening module on introductory probability, the probabilistic method, and derandomization across four sessions (Lessons 1–4), including lecture delivery and guided problem solving.

Finland, FI
April - May. 2025

Teaching Assistant, Computability and Computational Complexity Theory (BSc), University of Rome “Tor Vergata”, (In Italian). Delivered a 2-hour weekly session throughout the semester focused on problem solving: proposing exercises, guiding students through solution strategies, and presenting complete solutions and proof techniques.

Rome, IT
Oct. 2018 – Jun. 2019

Teaching Assistant, Computer Programming in C (BSc), University of Rome “Tor Vergata” (In Italian). Led exercise sessions focused on problem solving and programming practice, supported students during in-class exercises, and graded weekly homework assignments.

Rome, IT
Oct. 2017 – Jun. 2018

Work

Software Developer, WeDot Rome.

Rome, IT
Oct. 2015 – Jun. 2016
Falerone, IT
Jun. – Sep. 2010

Software Developer, New System.

Languages

- Italian **Mother tongue**
- English **Fluent**

Programming Skills

- Basic: OWL, SPARQL, FORTRAN, COBOL, LISP
- Intermediate: GO, MATLAB, JAVASCRIPT, R, ASP.NET, PHP
- Advanced: PYTHON, JULIA, JAVA, C, C++, C#, SQL
- Frameworks: Apache Spark

Research Interests

- Graph Mining
- Random Graphs
- Distributed Computing
- Approximation Algorithms
- Temporal Graphs
- Statistical Learning
- Randomized Algorithms
- Evolving Graphs

Publications

In case of theoretical computer science conferences, authors are sorted alphabetically, otherwise by contribution.

Software Packages

- PROPAGATE, an efficient algorithm for approximating various distance-based metrics (i.e., average distance, effective diameter, diameter and connectivity rate).
<https://github.com/BigDataLaboratory/MHSE>
- DREG, a dynamic expander graph generator.
<https://github.com/Antonio-Cruciani/DREG-DynamicRandomExpanderGenerator>
- TSBPROXY, a suite of efficient proxies for the temporal betweenness centrality rankings.
<https://github.com/Antonio-Cruciani/TSBProxy>
- MANTRA, an efficient framework for approximating the temporal betweenness centrality using sampling.
<https://github.com/Antonio-Cruciani/MANTRA>
- FEPIC, an efficient approximation algorithm for the (doubly normalized) percolation centrality.
https://github.com/Antonio-Cruciani/percolation_centrality
- PERCIS, a fast approximation algorithm for the percolation centrality that uses imporance sampling.
<https://github.com/Antonio-Cruciani/PERCIS>
